### Wireless Presenter

User Manual

Instruction

The wireless presenter is a great tool for PowerPoint presentations! With it, you can easily present PowerPoint from over 30-meters away from your computer. It contains two parts: transmitter and USB receiver.

Features

1. Portability
   The transmitter and receiver are integrated into one unit to make the device as portable as possible.
2. Easily control the pace of your presentation
   Advanced 2.4GHz radio frequency (RF) technology can works through walls and a distance of over 30-meter, so you never need to stand beside your computer.
3. Multifunctional presenter
   It combines the functions of a laser pointer, multimedia controller and hotkeys.
4. Plug & Play
   No installation required. Just plug the receiver into your computer and the device is ready to use.

Function

Key	Function and Introduction
☀	Press for turn on laser. Release for turn off laser.
Indicator	Working Indicator: Pressing any key will turn the indicator on. Indicator will turn off 3 seconds after last key press. Low Battery Indicator: If the indicator blinks quickly then the device is low on power. Please charge the device immediately. Charging Indicator: The indicator will blink slowly whilst charging. Once fully charged, the indicator will remain solid until the charger is unplugged.
∧	Page Up
	Long press for Play/Esc (For PowerPoint only)
∨	Page Down
	Long press for Blank Screen (For PowerPoint only)
Power Switch	Slide up for power the device on. Slide down for power the device off.
Charging port	Device supports Micro-USB.

Operating Hints

• Remove the USB receiver from the device and insert it into your computer's USB port. The device works out of the box and requires no additional software.
• Upon first installation on Mac, Keyboard Set Assistant may appear and inform you that the keyboard cannot be identified. Just click "Continue" to finish the installation, and then the presenter will work accordingly.
• Wireless interference may decrease the effective range of the device.
• The device will go into Sleep Mode after an extended period of inactivity. Press any key to wake the device up.

USB Charging

The product is built-in lithium battery, and can be charged by USB. Suggested charging time is about 1.5 hours. When charging, indicator blinks slowly; once full charged, Indicator will remain solid.
Note: When on low battery, the effective range of the device will be reduced. Please be sure to charge the device regularly.

Technical parameters

Transmitter

RF Frequency	2.4GHz
RF Output power	0dBm
Control distance	30M
Max output	<1mW
Laser distance	Up to 200M (Normal condition without obstacle)
Battery Capacity	120mAh
Sleep current	<15uA
Dimension	120*30*22mm
Weight	27g (including receiver)

Receiver

Operation system	Windows , Mac
Interface	USB1.1 , Compatible with USB2.0, USB3.0
Working voltage	USB electricity supply (4.5-5.5V)
Dimension	24*12*5mm
Weight	2g
